

## With the *PureFlight™* you can:

- Know your distances by club in your current environment (altitude, temperature, wind, etc.)
- Improve your overall shot making ability
- Receive objective feedback from your practice sessions
- Track history and compete against yourself
- Identify areas in need of improvement
- Use PTR to track solidness of your hits
- Use with short shots through drives
- Master 1/2 and 3/4 shots
- Compare different clubs and balls to optimize your game
- Great for outdoor club fitting where ball flight can be visually tracked
- Excellent for customer warm-up and post fitting club comparison
- Use at demo days for club testing and sales
- Use at tournaments and other events for long drive, guess your distance and other contests

## Practice Software:

- Upload practice session metrics to your computer for further analysis
- Build history for analysis and improvement
- View and print your metrics
- Gap your clubs and print a bag tag
- Know your distance ranges per club
- Identify your “Golf Success Factors” just like the Pros

## Fitting Software:

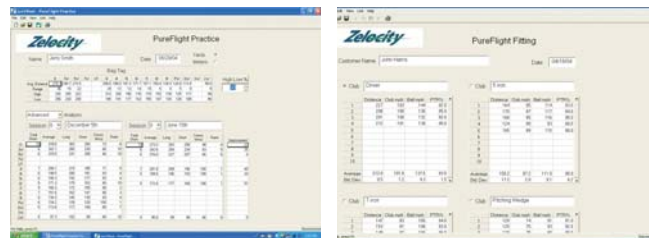

- Real-time data capture while hitting shots on the *PureFlight™*
- Build history for analysis and improvement
- View and print session metrics plus consistency and composite graphs by club
- Analyze golfer metrics for club selection and custom fitting
- Rank golfer consistency across clubs

## Other Features:

- Instantly, accurately displays and records critical information for every shot
- No left-to-right hand swing adjustment required
- No adjustment for any clubs
- Hit off natural turf or practice mats
- Accurate from 20 to 420 yards
- Unit works on rechargeable batteries or AC power
- Use with or without a computer
- On-board display
- Optional external display; great for clinics, tournaments or viewing metrics from a distance
- 1000-shot memory
- Made in USA

## The Convenience of *PureFlight™*:

- Accurate, affordable, portable
- Easy to use
- Lightweight – under 3 lbs.
- Small: 4”H x 5”W x 8”D
- Protective travel bag included

*PureFlight™* software captures, analyzes and displays data for Practice Sessions or Club Fitting
